

AUTO POWER ADAPTER

The Lind Automobile Power Adapter is designed to power your laptop computer and to charge its internal battery from an appropriate DC voltage power source (see adapter label for acceptable DC voltage ranges). The adapter supplies current and voltage levels as required by the laptop.

The adapter provides safe power to your laptop by protecting it from spikes and power surges which may occur in a DC voltage electrical system.

Use only with IT equipment. Protection Class III.

SPECIAL USE WARNING

Do not use this adapter with a lighter plug splitter or extender cable. These devices can cause the adapter cigarette lighter plug to become very hot. The plastic case of the splitter receptacle traps the heat in the plug and does not allow it to dissipate.

Contact Lind at (800) 659-5956 or via email at techsupport@lindelectronics.com to place an order or for help with any questions.

OPERATING INSTRUCTIONS

This Lind adapter is supplied with one of two types of cigarette plug connectors. One version has an LED to indicate that input power is present. The other version has a slide switch to provide a tighter fit in some cigarette sockets. Move the switch from position N (narrow) to W (wide) if the connector fits loosely in the cigarette socket. Some models also include an airline in-seat power cable.

NOTE: This adapter utilizes components that may degrade if stored unused for several years. Apply power for several minutes yearly to avoid problems.

TECHNICAL INFORMATION

Power Input	Noted on label
Power Output:	Noted on label
Input Fuse:	See label on input cable
Indicators:	LED on lighter plug on some models (Input present) LED on adapter (Output power present)
Features:	Output Short Circuit Protected Output Current Limit Internal Overtemperature Shut down Low Input Voltage Shut down High Input Voltage Shut down Automatic Reset of Safety Shut down

NOTE: This adapter utilizes components that may degrade if stored unused for several years. Apply power for several minutes yearly to avoid problems.
