BATTERY CABLE HARNESS

Wire Harnesses

Manage high-current electrical connections between a vehicle battery and accessories. Quickly and easily install to manage your power from the battery to a power distribution system as part of your complete harness install. Save assembly time with a ready foundation to manage the front end of your harness. Enable optimum current flow and reduce risk of loose connections with ring terminals that bolt securely onto battery terminals and ground points to stay intact.

MORE INFORMATION

- Ask us about power distribution options and shutdown timers downstream to complete your harness.
- Contact Lind for your custom power runs and we will design to order.

CERTIFICATES & TESTING

- Built to IPC-WHMA-A0620 Standards

PRODUCT SELECTION

ITEM NUMBER	DESCRIPTION
CBLWH-00001	Battery Cable 175" long with 150A Circuit Breaker
CBLWH-00002	Battery Cable 125" long with 150A Circuit Breaker
CBLWH-00003	Battery Cable 175" long with 100A Circuit Breaker
CBLWH-00004	Battery Cable 125" long with 100A Circuit Breaker

PUBLIC SAFETY

FEATURES & BENEFITS

- Lengths from 125-175" long to universally fit in almost any vehicle.
- 6 awg M8 ring terminals arrived crimped for easy battery connections
- 6 awg XLPE and PVC SAE J1127 cables to safely carry high amperage loads
- Circuit breakers (100A or 150A) to protect downline devices from surges
- In line fuses at less amperage than mechanical circuit breaker to provide the first line of defense from power surges that can damage devices
- Complete protective braiding across the length of the cable
- Printing on wires show orientation of side connecting to battery

LIND WARRANTY

- Lind Battery Cable Harnesses are built in the US for quick shipment. All products are tested before they ship out the door and are backed by our 1-Year Limited warranty.
